

Anti-BAI1 antibody

 Cat. No.
 ml161476

 Package
 25 μl/100 μl/200 μl

 Storage
 -20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Product overview	
Description	Anti-BAI1 rabbit polyclonal antibody
Applications	ELISA, IHC
Immunogen	Synthetic peptide of human BAI1
Reactivity	Human, Mouse
Content	0.4 mg/ml 🥂
Host species	Rabbit
lg class	Immunogen-specific rabbit IgG
Purification	Antigen affinity purification
Target information	
Symbol	BAI1
Full name	brain-specific angiogenesis inhibitor 1
Synonyms	GDAIF
Swissprot	O14514

Target Background

Angiogenesis is controlled by a local balance between stimulators and inhibitors of new vessel growth and is suppressed under normal physiologic conditions. Angiogenesis has been shown to be essential for growth and metastasis of solid tumors. In order to obtain blood supply for their growth, tumor cells are potently angiogenic and attract new vessels as results of increased secretion of inducers and decreased production of endogenous negative regulators. BAI1 contains at least one 'functional' p53-binding site within an intron, and its expression has been shown to be induced by wildtype p53.

Applications Immunohistochemistry

Predicted cell location: Cytoplasm and Nucleus Positive control: Human gasrtic cancer Recommended dilution: 50-200

The image on the left is immunohistochemistry of paraffin-embedded Human gasrtic cancer tissue using ml161476(BAl1 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: ×200)

ELISA

Recommended dilution: 2000-5000

Predicted cell location: Cytoplasm and Nucleus Positive control: Human thyroid cancer Recommended dilution: 50-200

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using ml161476(BAI1 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: ×200)
