Full name microtubule associated tumor suppressor 1

Synonyms ATBP; ATIP; ICIS; MP44; MTSG1

Swissprot Q9ULD2

Target Background

This gene encodes a protein which contains a C-terminal domain able to interact with the angiotension II (AT2) receptor and a large coiled-coil region allowing dimerization. Multiple alternatively spliced transcript variants encoding different isoforms have been found for this gene. One of the transcript variants has been shown to encode a mitochondrial protein that acts as a tumor suppressor and partcipates in AT2 signaling pathways.
