

Anti-VPS35 antibody

Cat. No.	ml223552
Package	25 µl/100 µl/200 µl
Storage	-20°C, pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol

Product overview

Description	Anti-VPS35 rabbit polyclonal antibody
Applications	ELISA, IHC
Immunogen	Fusion protein of human VPS35
Reactivity	Human, Mouse
Content	1.2 mg/ml
Host species	Rabbit
Ig class	Immunogen-specific rabbit IgG
Purification	Antigen affinity purification

Target information

Symbol	VPS35
Full name	vacuolar protein sorting 35 homolog (S. cerevisiae)
Synonyms	MEM3; PARK17
Swissprot	Q96QK1

Target Background

This gene belongs to a group of vacuolar protein sorting (VPS) genes. The encoded protein is a component of a large multimeric complex, termed the retromer complex, involved in retrograde transport of proteins from endosomes to the trans-Golgi network. The close structural similarity between the yeast and human proteins that make up this complex suggests a similarity in function. Expression studies in yeast and mammalian cells indicate that this protein interacts directly with VPS35, which serves as the core of the retromer complex.

Applications

Immunohistochemistry

Predicted cell location: Cytoplasm

Positive control: Human esophagus cancer

Recommended dilution: 30-150

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using ml223552(VPS35 Antibody) at dilution 1/45, on the right is treated with fusion protein. (Original magnification: $\times 200$)

ELISA

Recommended dilution: 2000-10000
