

Anti-PGR antibody

 Cat. No.
 ml261090

 Package
 25 μl/100 μl/200 μl

 Storage
 -20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Product overview	
Description	Anti-PGR rabbit polyclonal antibody
Applications	ELISA, IHC
Immunogen	Synthetic peptide of human PGR
Reactivity	Human
Content	0.3 mg/ml
Host species	Rabbit
lg class	Immunogen-specific rabbit IgG
Purification	Antigen affinity purification
Target information	
Symbol	PGR
Full name	Progesterone receptor

PGR Progesterone receptor PR, NR3C3 P06401

Target Background

Synonyms

Swissprot

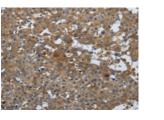

This gene encodes a member of the steroid receptor superfamily. The encoded protein mediates the physiological effects of progesterone, which plays a central role in reproductive events associated with the establishment and maintenance of pregnancy. This gene uses two distinct promotors and translation start sites in the first exon to produce two isoforms, A and B. The two isoforms are identical except for the additional 165 amino acids found in the N-terminus of isoform B and mediate their own response genes and physiologic effects with little overlap.

Applications Immunohistochemistry

Predicted cell location: Cytoplasm, Nucleus Positive control: Human breast cancer Recommended dilution: 25-100

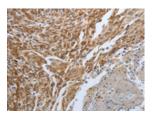

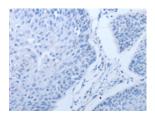

Recommended dilution: 1000-5000

The image on the left is immunohistochemistry of paraffin-embedded Human breast cancer tissue using ml261090(PGR Antibody) at dilution 1/25, on the right is treated with synthetic peptide. (Original magnification: ×200)

Predicted cell location: Cytoplasm, Nucleus Positive control: Human cervical cancer Recommended dilution: 25-100

The image on the left is immunohistochemistry of paraffin-embedded Human cervical cancer tissue using ml261090(PGR Antibody) at dilution 1/25, on the right is treated with synthetic peptide. (Original magnification: ×200)
