

## Anti-HLTF antibody

Cat. No. ml261745 Package 25 µl/100 µl/200 µl -20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol Storage

| Product overview   |                                                      |
|--------------------|------------------------------------------------------|
| Description        | Anti-HLTF rabbit polyclonal antibody                 |
| Applications       | ELISA, IHC                                           |
| Immunogen          | Synthetic peptide of human HLTF                      |
| Reactivity         | Human                                                |
| Content            | 1 mg/ml                                              |
| Host species       | Rabbit                                               |
| lg class           | Immunogen-specific rabbit IgG                        |
| Purification       | Antigen affinity purification                        |
|                    |                                                      |
| Target information |                                                      |
| Symbol             | HLTF                                                 |
| Full name          | helicase-like transcription factor                   |
| Synonyms           | ZBU1; HLTF1; RNF80; HIP116; SNF2L3; HIP116A; SMARCA3 |
| Swissprot          | Q14527                                               |
|                    |                                                      |
|                    |                                                      |
| Target Background  | du la            |
|                    |                                                      |

## **Target Background**

This gene encodes a member of the SWI/SNF family. Members of this family have helicase and ATPase activities and are thought to regulate transcription of certain genes by altering the chromatin structure around those genes. The encoded protein contains a RING finger DNA binding motif. Two transcript variants encoding the same protein have been found for this gene. However, use of an alternative translation start site produces an isoform that is truncated at the N-terminus compared to the full-length protein.

## Applications Immunohistochemistry

ELISA

Predicted cell location: Cytoplasm or Nucleus Positive control: Human gasrtic cancer Recommended dilution: 50-200

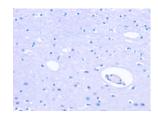

Recommended dilution: 2000-5000

The image on the left is immunohistochemistry of paraffin-embedded Human gasrtic cancer tissue using ml261745(HLTF Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: ×200)

Predicted cell location: Cytoplasm or Nucleus Positive control: Human brain Recommended dilution: 50-200

The image on the left is immunohistochemistry of paraffin-embedded tissue using ml261745(HLTF Antibody) at dilution Human brain 1/40, on the right is treated with synthetic peptide. (Original magnification: ×200)
