Anti-BMF antibody

Cat. No. ml262765

Package 25 μ l/100 μ l/200 μ l

Storage -20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Product overview

Description Anti-BMF rabbit polyclonal antibody

Applications ELISA, IHC

Immunogen Synthetic peptide of human BMF

Reactivity Human, Mouse, Rat

Content0.6 mg/mlHost speciesRabbit

Ig classImmunogen-specific rabbit IgGPurificationAntigen affinity purification

Target information

Symbol BMF

Full name Bcl2 modifying factor

Synonyms

Swissprot Q96LC9

Target Background

The protein encoded by this gene belongs to the BCL2 protein family. BCL2 family members form hetero- or homodimers and act as anti- or pro-apoptotic regulators that are involved in a wide variety of cellular activities. This protein contains a single BCL2 homology domain 3 (BH3), and has been shown to bind BCL2 proteins and function as an apoptotic activator. This protein is found to be sequestered to myosin V motors by its association with dynein light chain 2, which may be important for sensing intracellular damage and triggering apoptosis. Alternatively spliced transcript variants encoding different isoforms have been identified.

Applications

Immunohistochemistry

Predicted cell location: Cytoplasm Positive control: Human prostate cancer

Recommended dilution: 20-100

The image on the left is immunohistochemistry of paraffin-embedded Human prostate cancer tissue using ml262765(BMF Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: ×200)

ELISA

Recommended dilution: 2000-5000
