Anti-CHAMP1 antibody

Cat. No. ml263323

Package 25 μ l/100 μ l/200 μ l

Storage -20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Product overview

Description Anti-CHAMP1 rabbit polyclonal antibody

Applications ELISA, IHC

Immunogen Synthetic peptide of human CHAMP1

Reactivity Human, Mouse
Content 0.6 mg/ml
Host species Rabbit

Ig classImmunogen-specific rabbit IgGPurificationAntigen affinity purification

Target information

Symbol CHAMP1

Full name chromosome alignment maintaining phosphoprotein 1

Synonyms CAMP; CHAMP; MRD40; ZNF828; C13orf8

Swissprot Q96JM3

Target Background

CHAMP1 (chromosome alignment maintaining phosphoprotein 1), also known as ZNF828 or C13orf8, is a 812 amino acid protein containing one C2H2-type zinc finger. CHAMP1 is required for the proper alignment of chromosomes during metaphase, undergoing CDK1-dependent phosphorylation at multiple sites during mitosis. The phosphorylation counteracts the negative chromosomal alignment regulation of the zinc-finger domain of CHAMP1. One region of CHAMP1, the FPE region, is responsible for spindle and kinetochore localization, which is essential for proper chromosome alignment. CHAMP1 interacts with MAD2L2, PGOZ, CBX1, CBX3 and CBX5, and may recruit CENPE and CENPF to the kinetochore. The CHAMP1 gene is located on chromosome 13 and is conserved in chimpanzee, Rhesus monkey, dog, cow, mouse, rat and chicken.

Applications

Immunohistochemistry

Predicted cell location: Nucleus and Cytoplasm Positive control: Human colorectal cancer

Recommended dilution: 30-150

The image on the left is immunohistochemistry of paraffin-embedded Human colorectal cancer tissue using ml263323(CHAMP1 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: ×200)

ELISA

Recommended dilution: 5000-10000
