Anti-CCL21 antibody

Cat. No. ml120374

Package 25 μl/100 μl/200 μl

Storage -20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Product overview

Description Anti-CCL21 rabbit polyclonal antibody

Applications ELISA, IHC

Immunogen Fusion protein of human CCL21

Reactivity Human

Content 0.6 mg/ml

Host species Rabbit

Ig classImmunogen-specific rabbit IgGPurificationAntigen affinity purification

Target information

Symbol CCL21

Full name chemokine (C-C motif) ligand 21

Synonyms ECL; SLC; CKb9; TCA4; 6Ckine; SCYA21

Swissprot 000585

Target Background

This gene is one of several CC cytokine genes clustered on the p-arm of chromosome 9. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. Similar to other chemokines the protein encoded by this gene inhibits hemopoiesis and stimulates chemotaxis. This protein is chemotactic in vitro for thymocytes and activated T cells, but not for B cells, macrophages, or neutrophils. The cytokine encoded by this gene may also play a role in mediating homing of lymphocytes to secondary lymphoid organs. It is a high affinity functional ligand for chemokine receptor 7 that is expressed on T and B lymphocytes and a known receptor for another member of the cytokine family (small inducible cytokine A19).

Applications

Immunohistochemistry

Predicted cell location: Nucleus or Cytoplasm Positive control: Human cervical cancer

Recommended dilution: 50-200

The image on the left is immunohistochemistry of paraffin-embedded Human cervical cancer tissue using ml120374(CCL21 Antibody) at dilution 1/40, on the right is treated with fusion protein. (Original magnification: ×200)

ELISA

Recommended dilution: 2000-5000
