

Anti-TFAP2B antibody

Cat. No.	ml161285
Package	25 µl/100 µl/200 µl
Storage	-20°C, pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol

Product overview

Description	Anti-TFAP2B rabbit polyclonal antibody
Applications	ELISA, WB
Immunogen	Synthetic peptide of human TFAP2B
Reactivity	Human, Mouse
Content	0.3 mg/ml
Host species	Rabbit
Ig class	Immunogen-specific rabbit IgG
Purification	Antigen affinity purification

Target information

Symbol	TFAP2B
Full name	transcription factor AP-2 beta (activating enhancer binding protein 2 beta)
Synonyms	AP-2B; AP2-B
Swissprot	Q92481

Target Background

This gene encodes a member of the AP-2 family of transcription factors. AP-2 proteins form homo- or hetero-dimers with other AP-2 family members and bind specific DNA sequences. They are thought to stimulate cell proliferation and suppress terminal differentiation of specific cell types during embryonic development. Specific AP-2 family members differ in their expression patterns and binding affinity for different promoters. This protein functions as both a transcriptional activator and repressor. Mutations in this gene result in autosomal dominant Char syndrome, suggesting that this gene functions in the differentiation of neural crest cell derivatives.

Applications

Western blotting

Predicted band size:50 kDa

Positive control:Jurkat cells

Recommended dilution: 200-1000

Gel: 10%SDS-PAGE

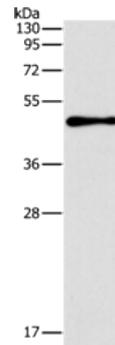

Lysate: 40 µg

Lane: Jurkat cells

Primary antibody: ml161285(TFAP2B Antibody) at dilution
1/416.6

Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution

Exposure time: 40 seconds

ELISA

Recommended dilution:1000-2000
