

Anti-KCNS3 antibody

Cat. No.	ml125087
Package	25 μl/100 μl/200 μl
Storage	-20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Product overview	
Description	Anti-KCNS3 rabbit polyclonal antibody
Applications	ELISA, IHC
Immunogen	Fusion protein of human KCNS3
Reactivity	Human, Mouse, Rat
Content	0.72 mg/ml
Host species	Rabbit
lg class	Immunogen-specific rabbit IgG
Purification	Antigen affinity purification
Target information	
Symbol	KCNS3
Full name	potassium voltage-gated channel modifier subfamily S member 3
Synonyms	KV9.3
Swissprot	Q9BQ31
Target Background	

Target Background

Voltage-gated potassium channels form the largest and most diversified class of ion channels and are present in both excitable and nonexcitable cells. Their main functions are associated with the regulation of the resting membrane potential and the control of the shape and frequency of action potentials. The alpha subunits are of 2 types: those that are functional by themselves and those that are electrically silent but capable of modulating the activity of specific functional alpha subunits. The protein encoded by this gene is not functional by itself but can form heteromultimers with member 1 and with member 2 (and possibly other members) of the Shab-related subfamily of potassium voltage-gated channel proteins. This gene belongs to the S subfamily of the potassium channel family. Alternatively spliced transcript variants encoding the same protein have been found for this gene.

Applications Immunohistochemistry

Predicted cell location: Cytoplasm and Cell membrane Positive control: Human prostate cancer Recommended dilution: 30-150

The image on the left is immunohistochemistry of paraffin-embedded Human prostate cancer tissue using ml125087(KCNS3 Antibody) at dilution 1/20, on the right is treated with fusion protein. (Original magnification: ×200)

ELISA

Recommended dilution: 5000-10000
