Anti-USP35 antibody

Cat. No. ml124192

Package 25 μ l/100 μ l/200 μ l

Storage -20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Product overview

Description Anti-USP35 rabbit polyclonal antibody

Applications ELISA, IHC

Immunogen Fusion protein of human USP35

ReactivityHumanContent0.9 mg/mlHost speciesRabbit

Ig classImmunogen-specific rabbit IgGPurificationAntigen affinity purification

Target information

Symbol USP35

Full name ubiquitin specific peptidase 35

Synonyms

Swissprot Q9P2H5

Target Background

USP35 (ubiquitin specific peptidase 35) is a 1,017 amino acid protein that belongs to the peptidase C19 family. Expressed in pancreas, testis and skeletal muscle, USP35 functions to catalyze the conversion of a ubiquitin C-terminal thioester and water to free ubiquitin and a thiol, a reaction that may play a role in signaling events throughout the cell.

Applications

Immunohistochemistry

Predicted cell location: Nucleus and Cytoplasm

Positive control: Human brain Recommended dilution: 40-200

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using ml124192(USP35 Antibody) at dilution 1/55, on the right is treated with fusion protein. (Original magnification: ×200)

ELISA

Recommended dilution: 5000-10000
