

兔抗 ANAPC2 多克隆抗体

中文名称：兔抗 ANAPC2 多克隆抗体

英文名称：Anti-ANAPC2 rabbit polyclonal antibody

别名：APC2; RP11-350O14.5

相关类别：一抗

抗原：ANAPC2

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

A large protein complex, termed the anaphase-promoting complex (APC), or the cyclosome, promotes metaphase-anaphase transition by ubiquitinating its specific substrates such as mitotic cyclins and anaphase inhibitor, which are subsequently degraded by the 26S proteasome. Biochemical studies have shown that the vertebrate APC contains eight subunits. The composition of the APC is highly conserved in organisms from yeast to humans. The product of this gene is a component of the complex and shares sequence similarity with a recently identified family of proteins called cullins, which may also

	o be involved in ubiquitin-mediated degradation.
Applications:	ELISA, IHC
Name of antibody:	ANAPC2
Immunogen:	Fusion protein of human ANAPC2
Full name:	anaphase promoting complex subunit 2
Synonyms :	APC2; RP11-350O14.5
SwissProt:	Q9UJX6
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human thyroid cancer and human liver cancer
IHC Recommend dilution:	50-200
