

## CLK4 抗原（重组蛋白）

中文名称： CLK4 抗原（重组蛋白）

英文名称： CLK4 Antigen (Recombinant Protein)

别名： CDC like kinase 4

储存： 冷冻（-20℃）

相关类别： 抗原

概述

Fusion protein corresponding to a region derived from 1-54 amino acids of human CLK4

技术规格

<b>Full name:</b>	CDC like kinase 4
<b>Swissprot:</b>	Q9HAZ1
<b>Gene Accession:</b>	BC065732
<b>Purity:</b>	>85%, as determined by Coomassie blue stained SDS-PAGE
<b>Expression system:</b>	Escherichia coli
<b>Tags:</b>	His tag C-Terminus, GST tag N-Terminus
<b>Background:</b>	The protein encoded by this gene belongs to the CDC2-like protein kinase (CLK) family. This protein kinase can interact with and phosphorylate the serine- and arginine-rich (SR) proteins, which are known to play an important role in the formation of spliceosomes, and thus may be involved in the regulation of alternative splicing. Studies in the Israeli sand rat <i>Psammomys obesus</i> suggested that the ubiquitin-like 5 (UBL5/BEACON), a highly conserved ubiquitin-like protein, may interact with and regulate the activity of this kinase. Multiple alternatively spliced transcript variants have been observed, but the full-length

h natures of which have not yet been determined.
