

兔抗 BOLA1 多克隆抗体

中文名称：兔抗 BOLA1 多克隆抗体

英文名称：Anti-BOLA1 rabbit polyclonal antibody

别名：bola family member 1; CGI-143

相关类别：一抗

抗原：BOLA1

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	BOLA1 (BoLA-like protein 1), also known as CGI-143, is a member of the BoLA/yrbA family of proteins. Members of this family are homologs of the Escherichia coli protein, BoLA. BoLA-like proteins are evolutionarily conserved from prokaryotes to eukaryotes and are believed to play a role in cell-cycle regulation or cell proliferation possibly via some sort of transcription regulation of other genes. In addition, BoLA-like proteins may contain nucleic-acid binding properties, as is suggested by a fold structure that is similar to the KH-fold, a motif known to participate in nucleic-acid binding. Characteristic of BoLA-like p

	roteins which typically consist of approximately 100 amino acids, BOLA1 is a 137 amino acid protein.
Applications:	ELISA, IHC
Name of antibody:	BOLA1
Immunogen:	Full length fusion protein
Full name:	bolA family member 1
Synonyms:	CGI-143
SwissProt:	Q9Y3E2
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human esophagus cancer and human liver cancer
IHC Recommend dilution:	40-200
