

兔抗 FGF5 多克隆抗体

中文名称：兔抗 FGF5 多克隆抗体

英文名称：Anti-FGF5 rabbit polyclonal antibody

别名：HBGF-5; TCMGLY; Smag-82

相关类别：一抗

抗原：FGF5

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human

标记物 v Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This gene was identified as an oncogene, which confers transforming potential when transfected into mammalian cells. Targeted disruption of the homolog of this gene in mouse resulted in the phenotype of abnormally long hair, which suggested a function as an inhibitor of hair elongation. Alter

	natively spliced transcript variants encoding different isoforms have been identified.
Applications:	ELISA, IHC
Name of antibody:	FGF5
Immunogen:	Synthetic peptide of human FGF5
Full name:	fibroblast growth factor 5
Synonyms:	HBGF-5; TCMGLY; Smag-82
SwissProt:	P12034
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human brain
IHC Recommend dilution:	20-100
