

兔抗 FGF6 多克隆抗体

中文名称：兔抗 FGF6 多克隆抗体

英文名称：Anti-FGF6 rabbit polyclonal antibody

别名：fibroblast growth factor 6; HST2; HBGF-6

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：FGF6

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This gene displayed oncogenic transforming activity when transfected into mammalian cells. The mouse homolog of this gene exhibits a restricted expression profile predominantly in the myogenic lineage, which suggested a role in muscle regeneration or differentiation.

Applications:	ELISA, WB
Name of antibody:	FGF6
Immunogen:	Synthetic peptide of human FGF6
Full name:	fibroblast growth factor 6
Synonyms:	HST2; HBGF-6
SwissProt:	P10767
ELISA Recommended dilution:	5000-10000
WB Predicted band size:	23 kDa
WB Positive control:	HepG2, Hela, 293T cell lysates
WB Recommended dilution:	1000-5000
