

兔抗 FGF10 多克隆抗体

中文名称：兔抗 FGF10 多克隆抗体

英文名称：Anti-FGF10 rabbit polyclonal antibody

别名：fibroblast growth factor 10

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：FGF10

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This protein exhibits mitogenic activity for keratinizing epidermal cells, but essentially no activity for fibroblasts, which is similar to the biological activity of FGF7. Studies of the mouse homolog of suggested that this gene is required for embryonic epidermal morphogen

	esis including brain development, lung morphogenesis, and initiation of lim bud formation. This gene is also implicated to be a primary factor in the process of wound healing.
Applications:	ELISA, WB, IHC
Name of antibody:	FGF10
Immunogen:	Synthetic peptide of human FGF10
Full name:	fibroblast growth factor 10
SwissProt:	O15520
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human colorectal cancer
IHC Recommend dilution:	25-100
WB Predicted band size:	23 kDa
WB Positive control:	A549, HUVEC and 231 cell lysates
WB Recommended dilution:	500-2000
