

兔抗 FGF12 多克隆抗体

中文名称：兔抗 FGF12 多克隆抗体

英文名称：Anti-FGF12 rabbit polyclonal antibody

别名：FHF1, FGF12B

抗原：FGF12

储存：冷冻（-20℃）

宿主：Rabbit

相关类别：一抗

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth, and invasion. This growth factor lacks the N-terminal signal sequence present in most of the FGF family members, but it contains clusters of basic residues that have been demonstrated to act as a nuclear localization signal. When transfected into mammalian cells, this protein accumulated in the nucleus, but w

	as not secreted. The specific function of this gene has not yet been determined. Two alternatively spliced transcript variants encoding distinct isoforms have been reported. [
Applications:	ELISA, WB
Name of antibody:	FGF12
Immunogen:	Fusion protein of human FGF12
Full name:	fibroblast growth factor 12
Synonyms :	FHF1, FGF12B
SwissProt:	P61328
ELISA Recommended dilution:	2000-5000
WB Predicted band size:	20 kDa
WB Positive control:	Mouse brain tissue
WB Recommended dilution:	500-2000
