

兔抗 GPR153 多克隆抗体

中文名称: 兔抗 GPR153 多克隆抗体

英文名称: Anti-GPR153 rabbit polyclonal antibody

别名: G protein-coupled receptor 153; PGR1

储存: 冷冻 (-20℃)

抗原: GPR153

宿主: Rabbit

反应种属: Human

相关类别: 一抗

标记物: Unconjugate

克隆类型: rabbit polyclonal

技术规格

Background:

This gene encodes an integral membrane protein that belongs to the Class A rhodopsin superfamily of G protein coupled receptors. The encoded protein is expressed primarily in the central nervous system. A knockdown of the orthologous gene in rat is associated with a significant reduction in food intake and impaired decision making ability. Mutations in this gene are associated with schizophrenia, autism, and other neuropsychiatric disorders. The expression of this gene is activated by the glioma-associated oncogene homolog 1 transcription factor which, in turn, is activated by sonic hedgehog in normal and tumorigenic cells.

	ells.
Applications:	ELISA, IHC
Name of antibody:	GPR153
Immunogen:	Synthetic peptide of human GPR153
Full name:	G protein-coupled receptor 153
Synonyms:	PGR1
SwissProt:	Q6NV75
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human lung cancer
IHC Recommend dilution:	30-150
