技术规格

Background:	This gene encodes a hypothalamic neuropeptide precursor protein that gives rise to two mature neuropeptides, orexin A and orexin B, by proteolytic processing. Orexin A and orexin B, which bind to orphan G-protein coupled receptors HCRTR1 and HCRTR2, function in the regulation of sleep and arousal. This neuropeptide arrangement may also play a role in feeding behavior, metabolism, and homeostasis.
Applications:	ELISA, IHC
Name of antibody:	HCRT
Immunogen:	Synthetic peptide of human HCRT
Full name:	hypocretin (orexin) neuropeptide precursor

Synonyms:	OX; PPOX; NRCLP1
SwissProt:	O43612
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human colorectal cancer and human tonsil
IHC Recommend dilution:	25-100
