

BCL2L12 抗原(重组蛋白)

中文名称: BCL2L12 抗原(重组蛋白)

英文名称: BCL2L12 Antigen (Recombinant Protein)

储 存: 冷冻(-20℃)

相关类别: 抗原

概述

Fusion protein corresponding to a region derived from N terminal 333 amino acids of human BCL2L12

技术规格

Full name:	BCL2-like 12 (proline rich)
Swissprot:	Q9HB09
Gene Accession:	BC104005
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	This gene encodes a member of a family of proteins containing a Bcl-2 homology domain 2 (BH2). The encoded protein is an a nti-apoptotic factor that acts as an inhibitor of caspases 3 and 7 in the cytoplasm. In the nucleus, it binds to the p53 tumor supp ressor protein, preventing its association with target genes. Over expression of this gene has been detected in a number of differ ent cancers. There is a pseudogene for this gene on chromosom e 3. Alternative splicing results in multiple transcript variants
