技术规格

Background:	The protein encoded by this gene is a component of the Hippo signaling pathway, which controls organ size and tumor growth by enhancing apoptosis. Loss of the encoded protein results in cell proliferation and cancer formation. The encoded protein is also involved in the control of microtubule stability during cytokinesis. Several transcripts encoding different isoforms have been found for this gene.

SwissProt:	Q9H8S9
ELISA Recommended dilution :	5000-10000
IHC positive control:	Human tonsil and Human colorectal cancer
IHC Recommend dilution:	50-300
