

IL12RB1 抗原（重组蛋白）

中文名称：IL12RB1 抗原（重组蛋白）

英文名称：IL12RB1 Antigen (Recombinant Protein)

储 存： 冷冻（-20℃）

相关类别： 抗原

概述

Fusion protein corresponding to a region derived from 24-254 amino acids of human IL12RB1

技术规格

Full name:	interleukin 12 receptor, beta 1
Synonyms:	CD212; IL12RB; IL-12R-BETA1
Swissprot:	P42701
Gene Accession:	BC029121
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	The protein encoded by this gene is a type I transmembrane protein that belongs to the hemopoietin receptor superfamily. This protein binds to interleukine 12 (IL12) with a low affinity, and is thought to be a part of IL12 receptor complex. This protein forms a disulfide-linked oligomer, which is required for its IL12 binding activity. The coexpression of this and IL12RB2 proteins was shown to lead to the formation of high-affinity IL12 binding sites and reconstitution of IL12 dependent signaling. The lack of expression of this gene was found to result in the immunodeficiency of patients with severe mycobacterial and Salmonella infections. Two alternatively s

	pliced transcript variants of this gene encoding distinct isoforms have been reported.
