

兔抗 MSN 多克隆抗体

中文名称：兔抗 MSN 多克隆抗体

英文名称：Anti-MSN rabbit polyclonal antibody

储 存：冷冻（-20℃）

抗 原：MSN

宿 主：Rabbit

相关类别：一抗

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	Moesin (for membrane-organizing extension spike protein) is a member of the ERM family which includes ezrin and radixin. ERM proteins appear to function as cross-linkers between plasma membranes and actin-based cytoskeletons. Moesin is localized to filopodia and other membranous protrusions that are important for cell-cell recognition and signaling and for cell movement. Probably involved in connections of major cytoskeletal structures to the plasma membrane. May inhibit herpes simplex virus 1 infection at an early stage.
Applications:	ELISA, WB, IHC
Name of antibody:	MSN
Immunogen:	Fusion protein of human MSN
Full name:	moesin

SwissProt:	P26038
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human thyroid cancer and Human ovarian cancer
IHC Recommend dilution:	50-200
WB Predicted band size:	68 kDa
WB Positive control:	293T and A431 cells
WB Recommended dilution:	500-2000
