

兔抗 RAB13 多克隆抗体

中文名称：兔抗 RAB13 多克隆抗体

英文名称：Anti-RAB13 rabbit polyclonal antibody

别 名：RAB13, member RAS oncogene family; GIG4

相关类别：一抗

储 存：冷冻（-20℃）

宿 主：Rabbit

抗 原：RAB13

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene is a member of the Rab family of small G proteins and plays a role in regulating membrane trafficking between trans-Golgi network (TGN) and recycling endosomes (RE). The encoded protein is involved in the assembly of tight junctions, which are components of the apical junctional complex (AJC) of epithelial cells. The AJC plays a role in forming a barrier between luminal contents and the underlying tissue. Additional functions associated with the protein include endocytic recycling of occludin, regulation of epithelial cell

	scattering, neuronal regeneration and regulation of neurite outgrowth. Alternately spliced transcript variants have been observed for this gene. A pseudogene associated with this gene is located on chromosome 12.
Applications:	ELISA, IHC
Name of antibody:	RAB13
Immunogen:	Fusion protein of human RAB13
Full name:	RAB13, member RAS oncogene family
Synonyms:	GIG4
SwissProt:	P51153
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human tonsil and Human lung cancer
IHC Recommend dilution:	50-200
