

生物素标记的兔抗小鼠 lgG

- 中文名称: 生物素标记的兔抗小鼠 IgG
- 英文名称: Biotin-conjugated Rabbit anti-mouse IgG
- 相关类别: Biotin 标记二抗
- 储 存: 冷冻 (-20℃)
- 标记物: Biotin

技术规格

Background	Immunoglobulin G (IgG), is one of the most abundant proteins in ser um with normal levels between 9.5-12.5 mg/ml in adult blood. IgG is important for our defense against microorganisms and the molecules are produced by B lymphocytes as a part of our adaptive immune re sponse. The IgG molecule has two separate functions; to bind to the pathogen that elicited the response and to recruit other cells and m olecules to destroy the antigen. The variability of the IgG pool is ge nerated by somatic recombination and the number of specificities in an individual at a given time point is estimated to be 1011 variants.
Applications	1/1000-5000 for ELISA 1/1000-5000 for Western blotting 1/200-500 f or Immunohistochemistry/cytochemistry
