技术规格

Background:	This gene encodes a member of the PIWI subfamily of Ar gonaute proteins, evolutionarily conserved proteins contai ning both PAZ and Piwi motifs that play important roles i n stem cell self-renewal, RNA silencing, and translational r egulation in diverse organisms. The encoded protein may play a role as an intrinsic regulator of the self-renewal ca pacity of germline and hematopoietic stem cells. Alternati vely spliced transcript variants encoding different isoforms have been found for this gene.
Applications:	ELISA, IHC
Name of antibody:	PIWIL1

Immunogen:	Fusion protein of human PIWIL1
Full name:	piwi-like RNA-mediated gene silencing 1
Synonyms :	HIWI, MIWI, PIWI
SwissProt:	Q96J94
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human colon cancer and human esophagus cancer
IHC Recommend dilution:	25-100
