技术规格

Background:	This gene is regulated as part of the p53 tumor suppressor pathway and encodes a protein with sequence similarity to the bisphosphate domain of the glycolytic enzyme that degrades fructose-2,6-bisphosphate. The protein functions by blocking glycolysis and directing the pathway into the pentose phosphate shunt. Expression of this protein also protects cells from DNA damaging reactive oxygen species and provides some protection from DNA damage-induced apoptosis.
Applications:	ELISA, WB, IHC
Name of antibody:	TIGAR

Immunogen:	Synthetic peptide of human TIGAR
Full name:	TP53 induced glycolysis regulatory phosphatase
Synonyms :	FR2BP; C12orf5
SwissProt:	Q9NQ88
ELISA Recommended dilution:	1000-2000
IHC positive control:	Human cervical cancer and Human breast cancer
IHC Recommend dilution:	100-300
