

兔抗 IFFO2 多克隆抗体

中文名称：兔抗 IFFO2 多克隆抗体

英文名称：Anti-IFFO2 rabbit polyclonal antibody

别名：intermediate filament family orphan 2;

相关类别：一抗

抗原：IFFO2

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	IFFO2 (intermediate filament family orphan 2) is 517 amino acid protein that is encoded by a gene mapping to human chromosome 1p36.13 and mouse chromosome 4 D3. Human chromosome 1 spans 260 million base pairs, contains over 3,000 genes and comprises nearly 8% of the human genome. Chromosome 1 houses a large number of disease-associated genes, including those that are involved in familial adenomatous polyposis, Stickler syndrome, Parkinson's disease, Gaucher disease, schizophrenia and Usher syndrome. Aberrations in chromosome 1 are found in a variety of cancers, including head and neck cancer, malignant melanoma and multiple myeloma.
--------------------	--

Applications:	ELISA, WB, IHC
Name of antibody:	IFFO2
Immunogen:	Synthetic peptide of human IFFO2
Full name:	intermediate filament family orphan 2
SwissProt:	Q5TF58
ELISA Recommended dilution:	5000-10000
WB Predicted band size:	57 kDa
WB Positive control:	A549 cell lysate
WB Recommended dilution:	200-1000
